Work Experience

PCB Designer

Jun. 2025 - Pres.

Apple

- Used **Cadence Allegro** to complete layout of high speed and high power PCBs from 4 to 26 layers
- Completed layout of flex PCBs with up to 4 layers with high power and signal integrity requirements
- Routed **SOC** boards with high speed signals such as **PCIe 6.0** and **USB4**, and data rates of over **60 Gbps**
- Worked with PCB fabricators to resolve design issues throughout the design process
- Worked with **Claude Code** to develop custom **Allegro SKILL** scripts, creating new features and increasing work efficiency

PCB Layout Designer & Components Librarian

Jan. 2023 - May 2025

Kepler Communications

- Used **Altium** to design, layout, and simulate a power delivery board capable of **350W** for space applications
- Applied **DFM** and **DFT** principles to complete layout of complex 4-8 layer PCBs, often with high speed or high power
- Fully tested and qualified custom buck-boost power regulation boards
- Made hundreds of schematic symbols and PCB footprints to **IPC** standards
- Sped up designs and reduced workload with custom **C#** Altium extension that performed automated design checks
- Led migration of 7000+ components from SQL DB to Altium 365 and implemented consistent naming convention

Solutions Architecture Developer

May 2022 - Aug. 2022

BlackBerry Ltd.

- Worked as sole developer for a Syslog emulator to generate all types of BlackBerry Syslogs for test and demo use cases
- Designed a **Python** parser to convert Syslogs into JSON using a combination of RegEx and string methods
- Developed systems using **Docker** so the code could be easily run on any computer
- Wrote multiple blog posts about BlackBerry technologies on BlackBerry's developer blog

Solutions Architecture Developer

Sep. 2021 - Dec. 2021

BlackBerry Ltd.

- Aided in design of **React.js** application to allow users to automatically find security vulnerabilities in mobile apps
- Added and modified server side **REST** endpoints using **Node.js**
- Used **React Native** and **Firebase** to build an **Android** app to receive security threat notifications on remote devices

Hardware Designer - Research Assistant

Jan. 2021 - Apr. 2021

Institute for Quantum Computing - University of Waterloo

- Used **KiCad** to complete schematic capture and layout of an RF power amplifier PCB for use in a quantum simulator
- Designed and simulated 3rd order maximally flat (Butterworth) RF filters using **LTspice**
- Sourced components and wrote in depth guides and documentation

Motor Control Subteam Lead

Jul. 2019 - Apr. 2020

Waterloop Student Design Team

- Managed team of 6 students, taught important concepts, and supervised progress through weekly meetings
- Designed high power motor control board with 3-phase IGBT transistor inverter for linear induction motor
- Performed schematic capture and circuit board layout using **Altium Designer** and **KiCad**

Enterprise Solutions Developer - IoT

Sep. 2019 - Dec. 2019

BlackBerry Ltd.

- Sole designer and developer for proof of concept for smart security system
 - * Microcontroller used ultrasonic sensor and camera to detect motion and send video to **Raspberry Pi** via **MQTT**
 - * Used **Node.js** and **Python** on a **Raspberry Pi** to detect faces and send secure alerts to users via BlackBerry APIs
 - * System automatically disarmed when it detected a nearby familiar device or correct PIN was entered into keypad
- Wrote multiple technical articles on the BlackBerry developer blog
- Served as Subject Matter Expert on new BlackBerry REST API for both company partners and team members

Education

University of Waterloo

Sep. 2017 - Apr. 2022

Bachelor of Applied Science, Electrical Engineering

Dean's Honors List

Technical Skills

Hardware: IPC CID certified, Cadence Allegro, Altium Designer, KiCAD, LTSpice, Soldering, Oscilloscope

Software: Python, C#, C/C++, Java, JavaScript, SQL, Matlab

Embedded: PCIe, USB, SPI, I2C, UART, JTAG, CAN, ESP32, Arduino, Raspberry Pi, TI Launchpad

Other: Linux, Git, Docker, Node.js, React.js, REST
